Name: .... Title: ....

Company: .... Department: ....

Street: ....

Suburb: .... State: .... Postcode: ....

Telephone: ....Fax: .... Email: .... ☐ please send me future issues by email

From the July - August 2009 issue of RheoTalk, I am interested in the following:

• Application Notes

☐ Rheology of lubricating greases - HL-036E

☐ Improvement of the pharmaceutical coating process by rotational rheological characterisation - V234

☐ How to relate test results of a torque rheometer to problems in elastomer processing - LR-29

☐ Instrument application note: Current possibilities for extrusion and mixing - Rheo026TP

☐ Rheological characterisation of C-S-H - RF-210802-DE-01

☐ Rheometry of dispersions - HA016

• Technical Papers

☐ Rheology & micro-structure - Close analysis of foam structure recovery - PTE659

☐ QC Measurement for liquid food products and packaging - Rheo051

☐ On-line optical QC measurements for manufacturing industries - Rheo053TP

☐ Polymer and polymer process characterisation for applications based material and extruder optimisation - Rheo054

☐ Rheological measurements at higher pressures - D-002

☐ Vane rotors for pressure cells for HAAKE MARS and HAAKE RheoStress 6000 - P21

☐ Rheological characterisation of paints and inks - D-001

☐ UV curing cell for HAAKE Rheometers - P13

☐ Influence of different storage conditions on the rheological properties of cement based materials - Schl-011

☐ Material parameters on rheological studies of plasters and joint compounds - Schl-010

☐ The effect of temperature on rheological properties of cement paste and of fresh self compacting concrete - Schl-009

☐ Influence of the Rheological Properties Rheological Properties on the on the Fresh Concrete Fresh Concrete Pressure - Schl-08

☐ Properties of Fresh and Hardened Geopolymer Concrete - Schl-007

☐ Rheology of SCC-Mortars with sands of different shape - Schl-006

☐ Rheology of low-binder SCC - Schl-005

☐ The Influence of Steel Fibres on the Rheology of Self Compacting Concrete - Schl-04

☐ Influence of vertical vibration on support on the dynamic stability of subsea pipelines - Schl-003

From the July - August 2009 issue of RheoTalk, I am interested in the following:

• Products

☐ Modular Advanced Modular Universal Rheometer - HAAKE MARS

☐ Modular Advanced Universal Rheometer Accessory - HAAKE MARS RheoScope Module

☐ Universal Stress Rheometer - HAAKE RheoStress 6000

☐ Rotational Rheometer - HAAKE RotoVisco 1

☐ Software - HAAKE RheoWin

☐ Torque Rheometer - HAAKE PolyLab OS

☐ Concrete Rheometer - Schleibinger BT2 Rheometer

☐ Mortar & Concrete Rheometer - Schleibinger Viskomat XL

☐ Concrete Rheometer - Schleibinger Viskomat NT

☐ Extensional Rheometer - HAAKE CaBER 1

☐ Closed Circulator - HAAKE DynaMax

☐ Recirculating Chiller - NESLAB ThermoFlex

☐ Twin Screw Extruder - PRISM TSE

☐ Modular Twin Screw Extruder - PRISM EuroLab

☐ Sheet line take-off system - PRISM Sheet Take-Off

☐ High Speed Pellet Scan System - OCS PS200C

☐ PharmaLab - PRISM PharmaLab

☐ Change Bowl Mixer -PRISM Change Bowl Mixer

☐ Process Viscometer - Marimex ViscoScope

☐ Extrusion & Material Characterisation for Drug Development & Production

☐ Comprehensive Materials Characterisation for Polymer

• Services

☐ Calibration & Service. Please provide details on model of product and serial number: ....
